Dear Colleague,

The field of breast oncology is evolving in the most revolutionary manner with dramatic advances involving all the spheres of breast cancer treatment. Thanks to precision medicine, genomic landscaping, targeted therapies, diagnostic technology and surgical strategies. The field continues to gather momentum with personalized medicine.

Bigger may definitely not be better in the era of precision medicine. Traditional definitions of surgery give way to modern technology with the advent of LASERS, Cryoablation, ROLL and HIFU. Genomic landscape determine adjuvant therapy and NGS helps tackle drug resistance. Similarly IORT and hypofractionation have revolutionized the way radiation has been delivered in breast cancers.

So brace yourselves for a brainstorming rendezvous through the state of the art management of breast cancer with a glimpse of the future direction during the **16th Annual International Conference RGCON** themed "**BREAST CANCER IN THE ERA OF PRECISION MEDICINE**" organized by the Rajiv Gandhi cancer Institute & Research Centre between 3rd to 5th February 2017 at the **Habitat World, India habitat Centre, Lodhi Road, Delhi**. It is our pleasure and privilege to invite you all to Delhi in February 2017 to the academic extravaganza.

About RGCI

Rajiv Gandhi Cancer Institute and Research Centre is a visionary project of Indraprastha Cancer Society and Research Centre aimed at providing the best of Oncological Care to those who need it. The Institute started functioning on 1st July 1996 as a 152 bedded hospital and has been growing steadily and has never looked back.

Presently, it is a 302 bedded hospital, with state of the art facility for the diagnosis and treatment of cancer and is recognized as one of the premium Institutes not only in northern India but also in the entire country. Since its inception, the Institute has proved its capability as a Centre of excellence and has so far registered more than 1.5 lacs patients, coming from India & abroad. The philosophy of RGCI & RC is to constantly strive towards, excellence in onco-care through combination of latest technology, competent personnel and humane touch. This is reflected by the addition of Bone Marrow transplant unit, IMRT (Intensity Modulated Radiotherapy Technique), IGRT (Image Guided Radiation Therapy), DaVinci Robotic system and a True Beam, a first of its kind in Northern India.

The Institute has installed a 40 slice advanced PET-CT in the year 2007 which is working at its full capacity now. RGCI & RC is the first and only oncology centre to have PET-MRI Fusion & MRI guided biopsy that makes it one of the best cancer Institute in India. The quality of service of the Institute has been highlighted in the India Plus which states "If you want to be impressed by a 21st century cancer hospital, this is it."

- It is a comprehensive Cancer Care set-up with all facilities for Diagnosis and Treatment of all type of Cancers
- Its highly qualified and experienced oncology team is the hallmark of the organization
- Its own integrated Cancer Research Programs and Laboratory
- Its research program drives continuous improvements in all aspects of treatment and clinical care
- It has modern state-of-the-art diagnostic and therapeutic equipments
- First Hospital globally to qualify for ISO 9000 & I4001 Certification
- Recipient of Greentech Environmental Excellence Award 1999 & Golden Peacock Award for Environment Excellence 2000
- NABH & NABL accredited Hospital
- NABH Accredited Blood Bank
